

Room set-up and Audio Visual Requirements

- Table for props, set at “stage right” (preference is a 6 foot table)
- Prefer no lectern. If there is already one on stage, it would be appreciated if it could be moved off to the side in order for Penny to connect more directly with your audience.

If Olympic performance is to be shown:

- LCD projector with sound, and screen
- Table to accommodate LCD Projector and computer

- Lapel (clip) microphone is preferred

Penny does prefer to have full lighting. If the Olympic performance is shown, it is simply important that your audience be able to see the screens during that time.

Penny likes to record the session. She is pleased to work directly with your Audio Visual company to coordinate.
