

We have all been put on this Planet for a Reason and a Purpose. Sometimes we find that reason through love or affection of a certain Art or Talent and sometimes our Purpose is defined by our passion for making a difference in peoples' Lives.

At one point in time, we decide to make that Mission and Purpose timeless and to leave our Message as a Legacy for generations to come.

**Dr. Susan Hughes** is a #1 International Best-Selling Author, Speaker, Executive Coach Consultant, a now retired physician, and an unapologetic traumatic brain injury survivor. She has been educating people for over two decades on how the brain works to improve our learning and lives.

She was the typical over-extended physician, Wife and Mom to two amazing Kids. She founded a family practice in the Pacific Northwest seeing adults, pediatrics and even delivering over 3,000 babies. A multi-business owner, she was seeking options to improve her workload and life balance. The universe answered in an unexpected way when she was in a wicked car accident and as the vehicle spun her head hit the window. Retiring from clinical medicine, she focused on her recovery from the multiple injuries. During that pivotal time, she transitioned from a physician to a healer-advocate. She developed on-demand learning opportunities to help build resilience and confidence by teaching people how to bounce not just back from adversity, or even higher but truly bounce highest. She calls it Going from Impact to Becoming Impactful.

THE GIFT OF THE UNIVERSE THROUGH WOMEN THAT LEAD
