HUMAN GROWTH IN THE AGE OF AI

JACK MYERS

Media Ecologist | Author | Guide to Self-Trust in the AI Age

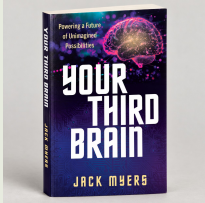

What Is AI Doing to Us?

**Build self-esteem. Strengthen self-trust.
Exercise human judgment.**

Use AI to see yourself more clearly, trust your judgment, and take a meaningful next step in your work and life.

CLARITY. AGENCY. POSSIBILITY.

YOUR THIRD BRAIN

Powering a Future of Unimagined Possibilities

The book is the foundation. H-U-M-A-N is the leadership framework.
The Seven Steps to Self-Respect turn the philosophy into personal practice.

For more than five decades, Jack has studied change and advised Fortune 200 companies globally. A student of Neil Postman at NYU and founder of The Myers Report, he connects technological change to human value, leadership, and choice.

THREE KEYNOTES. A HUMAN PERSPECTIVE FOR YOUR AUDIENCE.

What Is AI Doing to Us?

For corporate, association, and education audiences. Understand AI's human impact and leave with a practical question and action for using AI while retaining judgment.

The Possibilities Begin with You

For people navigating career or personal change. Apply the Seven Steps to Self-Respect and leave with a specific commitment for a challenge, relationship, goal, or transition.

Leading Human in the Intelligence Era

For executives, managers, HR, and talent leaders. Use the H-U-M-A-N Philosophy to begin a team conversation about AI, human contribution, and organizational change.

FROM KEYNOTE TO MEANINGFUL ACTION

Add a hands-on workshop with a worksheet and one action commitment. Optional opening/closing polls and a 30-day follow-up capture self-reported clarity, intent, action, and learning.

"an invitation to shape a future where technology amplifies our highest human potential"

Janet Foutty | Chair and CEO, Deloitte Consulting LLP (retired)
