

Speaker introduction, bio, and event requirements

Jack Lampka

AI Keynote Speaker & Advisor

Speaker introduction

Jack will provide a customized speaker introduction for the event based on the audience and the topics to be addressed. Here is an example of the speaker introduction:

The speaker who is about to take the stage brings 28 years of experience with artificial intelligence from the U.S. and Germany. He built data teams, developed strategies for AI, and tackled challenges in high-tech, pharma, and startups. Today, he is an AI keynote speaker and advisor, where he shifts the focus from tools to people. He makes AI understood and enables companies to accelerate AI adoption. His clients call him the voice of reason in AI. Please join me in welcoming Jack Lampka!

Tagline

With his 28 years of AI expertise, Jack Lampka enables companies to accelerate AI adoption by simplifying AI and switching the focus from tools to people.

Biography

Jack Lampka is a data & **AI expert** with **28 years' experience**, 14 years in the **USA** and 14 years in **Germany**. He built data teams, developed strategies for AI, and tackled business challenges in large **tech & pharma** companies, and startups. He had to learn the hard way that success with AI is not driven by technology or data. It's driven by people: executives, users, and developers. His **Master's in Engineering** and **MBA** enabled him to bridge the gap between technical developers, users, and business leaders to address this **human factor**. Today, Jack is a **KEYNOTE SPEAKER** and **ADVISOR**, enabling organizations to **accelerate AI adoption** by simplifying AI and switching the focus from tools to people. His clients call him the **voice of reason in AI**.

Technical requirements

For in-person events, Jack will bring his laptop to present visuals supporting his speech. He will need:

- Beamer (projector) with a screen (or a large monitor for smaller audiences)
- HDMI connecting cable
- Wireless head microphone for the speaker
- Wireless hand microphone for audience questions
- High bistro table to place laptop during speech
- Small table to place books off the stage

Additionally for workshops:

- Flipchart with black, red, and green marker pens

For virtual events Jack will connect with HD camera, professional headset, and high Internet bandwidth. He will need:

- Reliable video streaming platform with sufficient Internet bandwidth

Photo & video recordings

Photo and video recordings are expressly authorized. Event organizer will provide Jack all photos and videos from the event free of any copyrights. Jack may take photos or video record the speech himself. All photos and videos will be used by Jack for marketing purposes, including placing them on Jack's website and posting on social media.
