

Enabling AI with Human Intelligence – New Keynote

Many keynotes set out a vision for AI but don't solve the real world challenge for leaders of AI implementation.

My new keynote shows leaders where AI will help them and where they must develop their HI (Human Intelligence) to create an environment for effective AI implementation, organisational success and an action plan to deliver it.

Global DIY Summit 1400 industry leaders

Summit closing keynote, the third time I have spoken for DIY.

Thierry Henry, CEO Kingfisher Group said – "I found what you said really interesting so took notes to see what actions I can take."

Event organisers – "Chris's has added tremendous value to the DIY industry, and his insights shared at our Global DIY-Summit 2023 were truly enlightening. We celebrate his contributions to innovation, leadership, and success in the DIY world!"

AI and Human Intelligence CDO London Event

Contributed to 1 hour panel debate for Chief Digital & Information Officers event on the impact and implementation of AI, showing 60 CDOs why AI can only be effective with HI (Human Intelligence) was really valuable to them.

*Feedback from the Chair of CDO Institute – Jon Clay
"AWESOME SESSION! Thanks for your unique angle.
Developing Human Intelligence is key to successful AI implementation."*
