

ARI GUNZBURG

AV REQUIREMENTS

Ari will review the setup upon arrival and adapt to your available tech and set up as much as possible. For smaller groups a mic may not be required, please inquire.

Ari presents from his own modern MacBook Pro, which supports up to two HDMI outputs—for slides and presenter notes, if a confidence monitor is available.

Required:

- Wireless lavalier or headset mic is preferred; hand held mic is not ideal as Ari moves a lot
- HD Projector/screen or TV to display slides and short videos
- Audio connection from Ari's laptop (for in-presentation sound)
- Confidence monitor for presenter notes if available (via separate HDMI); if not available, Ari will present from his laptop near the speaking area
- Adequate room lighting for visibility
- AV tech or operator onsite during setup and ideally during the session
- 2 bottles of spring water

Preferred:

- Room set for high energy, i.e. no barriers
- Tables set in cabaret or classroom style if possible
- Event photography or video welcome, please credit and share footage/photos with Ari
- Backup clicker and mic batteries available onsite
- Small table near the stage for giveaway t-shirts

Provided by Ari:

- Laptop with slides and videos
- Clicker for slide advancement
- Slide deck and media files available in advance if needed
- Small props (carried on by Ari)
- T-shirts for select audience members

Please contact Ari or your bureau representative with any questions.
